

# Summer at Santa Catalina

## 2017 CLASS CHOICES • GIRLS ENTERING GRADES 3–6

### COOKING

---

#### ■ Petite Chefs

Let's get cooking! In this class campers learn how to read recipes, measure, assemble *mis en place* and prepare delicious food while learning how to taste and adjust for flavor. Campers learn basic knife skills to make cooking safe and easy. They also explore herbs and spices to create new and exciting flavors. Most importantly, there is much fun learning the joy of cooking, sharing, and eating!

### DANCE

---

#### ■ Ballet - Performance Class

Beautiful ballet is a core foundation for all dancers. Join us to learn the fundamentals such as barre work, across the floor, and ballet vocabulary, or improve the ballet background you already have! Students will learn a full dance to perform at the end of their session to show off their accomplishments.

#### ■ Hip-Hop - Performance Class

Have a blast in hip-hop class! Campers learn a selection of dance moves and hip-hop styles and then put the moves together in a dance to be performed on stage at the close of camp.

#### ■ Jazz - Performance Class

Ready for some high energy dancing? Whether campers bring their jazz shoes or jazz hands you will kick off the summer with fun music and great choreography. A lively and vigorous dance performance is the end project, performed at closing day. Expect finger snapping and plenty of toe tapping from the audience.

### MOVIE MAKING

---

#### ■ Movie Makers — NEW!

Make your very own movies by learning how to shoot and edit your own high-definition videos! In this class, you use film to tell your story. Learn how to best shoot video, and how to use iMovie to edit those videos. Cameras and computers are provided for you to use. The only limit will be your own imagination!

### PHOTOGRAPHY

---

#### ■ Digital Photography

Do you love taking pictures? Is it a favorite thing to do? If yes, then this is the class to take! Spend summer exploring the beautiful gardens on campus, taking photographs of flowers, trees, and architecture. Learn how to use the computer to enhance, manipulate, and print pictures. The possibilities are endless! Bring a point-and-shoot digital camera and a 16GB thumb drive.

### OUTDOOR EXPLORATION

---

#### ■ Earth to Sea

Explore the beautiful Monterey Peninsula from the mighty redwood to the ocean shoreline when marine biology meets outdoor explorer in this two-period class. This is a fun and fantastic class that entertains and teaches at the tide pool and the flower field. Classroom days are spent with activities, crafts, and nature games as a way to introduce not only the flora and fauna that share our coastal home but the beasties, including the outrageous otter and the creepy crab. Bring sunscreen and a day pack because this is "surf-to-turf" field studies.

### SCIENCE

---

#### ■ Mad Scientists — NEW!

Who says exploration isn't fun? Wacky and unexpected experiments open your eyes to the mysterious world around you. Experience science while doing experiments with everyday objects. Have surprising encounters with physics, biology, chemistry, and astronomy. Science is more than just reading—it's what we do! Calling all mad scientists!

### THEATRE ARTS & MUSIC

---

#### ■ Glee Club / Show Choir

Calling all young performers to sing and dance with friends old and new! In this class, campers learn the fundamentals of ensemble performance. Give life and expression to favorite songs while moving around the stage to entertain friends and family at the closing performance.

#### ■ Ready, Set, Act! - Performance Class

What does it take to act? Body exercises, games, voice projection, and improvisation are used to challenge the imagination and focus observation. Being on stage is all about teamwork and overcoming inhibition. Taught by a professional actor and theatrical performer, this class is a young actress's best choice!

## VISUAL ARTS

---

### ■ Art on Paper — NEW!

Tap into your inner artist! Always accessible, there is a world to explore with art on paper! During this series, you begin with a close look at the tools and practices of drawing, including perspective, shading, and other ways artists have used drawing to express both the outer and inner life. Budding and experienced artists learn to apply drawing skills and bring the “still” to life. You explore a variety of methods to create colorful pieces such as pastels, watercolors, and collage.

### ■ Natural Materials — NEW!

Connect with nature! Get your hands dirty in a variety of ways: building your own quick-dry sculptures from self-hardening clay; carving your own woodblock for printing; discovering the potency of plant dyes to create dynamic cotton tapestries. While learning these different ways of working, you explore the roots of each method used and look at the ways they are still being utilized by contemporary artists. Get messy, make mistakes, and create art!

### ■ Spatial Sculpture — NEW!

Simple to complex, this class dabbles in spatial relationships and materials that evolve from 2D to 3D. Take your drawing and transform it into a 3D object. Figure out how materials relate to each other and how you can use that relationship to test the limits of your creativity. Jumpstart the process with wire, then design and build mobiles, and finally put it all together as an original “assemblage” sculpture from recycled materials. Space is the final frontier!

### ■ We ♥ Ceramics — New projects!

Get messy, get creative, and learn the ancient art of ceramics! Working with clay, campers make wall planters, pebble pots, wind chimes and more. Add exciting texture to pieces with tools, twigs, and nature. Then, glaze the projects and give wild personality to the creations.

## YOGA

---

### ■ Yoga

Learn poses that can help develop a strong and healthy body, relax and cope with the stress of life, increase concentration and attention span, have greater self-confidence, and have fun—all at the same time? Whether you already practice yoga or are eager to find out what it is all about, this class is the perfect choice. Yoga is a method of exercising the body, mind, and soul. Campers learn breathing techniques and practice movements that help them achieve a lifelong foundation of well-being.
